

# ULTRAglaZe

*“Only Comparable to Glass”.....*

## Care & Maintenance

### OUR ADVICE

**DO NOT IMMEDIATELY REMOVE THE PROTECTIVE FILM.  
FILM SHOULD ONLY BE REMOVED ONCE ALL OTHER SITE TRADE  
WORK HAS BEEN COMPLETED.**

### CLEANING

For everyday cleaning, we recommend the use of warm water and a micro fibre cloth. Your Ultraglaze surface has a very high chemical resistance so you can also use any standard house hold cleaning product along with a micro fibre cloth.

Products such as Vuplex will add an extra lustre to your kitchen surfaces. New bottles of Vuplex can be purchased through your kitchen manufacturer.

### ULTRAglaZe SURFACE

Once the protective film is removed you should clean your doors and panels with a damp micro fibre cloth using a light circular motion. This will remove any residue left from the protective film.

Thank you for purchasing from our ULTRAglaZe range. We hope you enjoy your kitchen for many years to come.
