

Intended Use

Ultraglaze is used in the manufacture of interior kitchen doors and panels, commercial cabinetry and reception areas and other home interior applications such as laundry and vanity cabinets.

Limitations

Ultraglaze is not suitable for exterior applications or interior applications where a high moisture content is present over an extended period of time.

Where Ultraglaze is required to meet the requirements of the NZ Building Code, or forms part of a building system, the application and supporting structures must be designed by suitably qualified design professionals.

Please refer to our standard technical data sheet on our website www.ultraglaze.co.nz
